

Cross Compliance Meetings

A Date for your Diary

November 2011

Teagasc invites all farmers to attend a cross compliance meeting in their local area during the month of November.

These free information meetings will cover topics such as:--

- What happens during an inspection
- Nitrates, cattle, sheep, pesticide, and single farm payment inspection advice
- What records need to be kept and how to keep them
- The new land drainage and reclamation regulations

Check the list below to see what meeting is nearest to you. The experience of Teagasc advisers is that farmers can make small changes on their farms to avoid costly penalties. A cross compliance inspection can be a challenging time for farmers. At these meeting Teagasc advisers will show farmers what they can do on their farm to reduce the risk of a penalty on their Single Farm Payment, DAS, REPS and AEOS payments.

These are public meetings, all are welcome to attend
