

Project number:

Date: June 2015

Funding source:

Project dates:

Pasturebase Ireland

Description of Work

Development of a national grassland database

No grassland database for the agricultural industry, PBI has been in operation since 2013 and is gaining real credibility in the wider industry.

International Context

No other country has such a system, Teagasc are leading this area.

Opportunities

Teagasc is leading this area and can leverage more funding in the area of smart Agri.

Teagasc ICT is not well equipped to support any development in PBI currently and this needs to be looked at.
