

University College Dublin
Ireland's Global University

MAgrSc Agricultural Extension and Innovation

(Two Years Full Time)

Funded by the Teagasc Walsh Fellowships Programme

This is a two year taught Masters programme with students on professional placement for the full duration and completing modules for 90 credits (ECTs). Programme modules are designed to support traineeship learning with assignments and projects focused on student's professional placement and real life challenges.

On completion of this programme, graduates will be competent agricultural advisors, committed to on-going reflective practice and

seeking out more effective ways to support farmer decision making. Students will be able to develop and deliver appropriate agricultural advisory and educational programmes that serve the needs of farmers and farm families who are their clients. Students will adopt the skills to reflect critically on their practice as agricultural advisors and educators and be able to identify and exploit needs and opportunities for improved practice.

Key Fact

Students of this programme will complete a placement in Teagasc and will have the support of a mentor to guide the development of skills and support modules on reflective practice that will allow the student to develop a professional portfolio.

Why study at UCD?

Tradition

Established 1854, with 160 years of teaching & research excellence

Global profile

UCD is ranked in the top 1% of higher education institutions worldwide

Global community

Over 6,000 international students from over 120 countries study at UCD

Global careers

Degrees with high employability; dedicated careers support; 1 year stay-back visa

Safety

Modern parkland campus with 24 hour security, minutes from Dublin city centre

Course Content and Structure

90 credits taught masters

30 credits taught modules

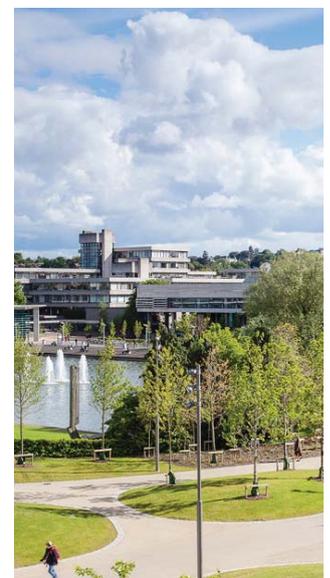

30 credits dissertation

30 credits reflective practice modules

Modules will be delivered through a blended format and will require students to build the skills for working autonomously, for independent research, in depth analysis, and abstraction. Assignments will be based on real life case studies relating to their professional work environment that will be complex and unpredictable, reflecting the norms of practice in advisory and education services.

Proposed taught modules for students enrolling on the Agricultural Extension and Innovation include:

- Agricultural Extension and innovation
- Research Methods Parts 1 and 2
- Creative Thinking and Innovation
- Dissertation
- Reflective practice modules

The Walsh Fellowships Programme

Through the provision of high quality research training, the Walsh Fellowships programme aims to contribute to the Teagasc objective of generating and applying new knowledge for the sustainable development of the agriculture and food processing industry, enable it to respond profitably to consumer demands and contribute to a vibrant rural economy and society.

This programme offers a unique opportunity to young graduates to undertake postgraduate research in Food, Animal (including pigs) and Grassland Production, Crops, Environment and Land Use, Rural Economics and Development, and other related disciplines.

Graduate Profile

Elaine Clifford
Drystock Advisor,
Teagasc

Having always wanted to work in the agricultural industry and after graduating from the Animal and Crop Production programme in UCD in 2016, I knew I wanted to work in the advisory services. The MAgrSc in Extension and Innovation was the perfect opportunity for me to gain experience in an advisory role, to help farmers run efficient, sustainable farming enterprises. This programme allows you to develop many skills through working closely with knowledgeable staff in varied areas of expertise, but also working off your own initiative. Combining professional work experience with the college modules enables you to focus your learning. It also encourages you to reflect on and evaluate the experiences you have and the people skills you develop through working with professionals. This practical and theory experience enhances your overall learning. The masters' modules are well delivered, very practical and relevant as assignments are based around the tasks you are completing and the experiences you encounter in your professional placement. I would highly recommend the MAEI programme to anyone who wishes to pursue a career in advisory or education as it helped me develop the skill set I needed to secure my current position as a drystock advisor with Teagasc.

Apply Now

Applications to this programme open in early April. Application forms can be downloaded from www.teagasc.ie or www.ucd.ie/agfood or by emailing agribus.ruraldev@ucd.ie.

This programme is fully funded by the Walsh Fellowships Programme and there is expected to be 10 places available on the programme. Shortlisted candidates will be called to interview early-mid July.

Entry Requirements

- Applicants must hold an upper second class honours degree or higher in agricultural science or equivalent discipline. Applicants with a pass degree coupled with significant and appropriate work experience may also be considered.
- Applicants whose first language is not English must also demonstrate English language proficiency of IELTS 6.5 (no band less than 6.0 in each element), or equivalent.

Careers

This Programme is designed to build the competencies required for careers in agricultural advisory and education services whether in the public or private sector. This programme will suit students interested in supporting farmers in agricultural innovation and development.
