Management Comments

- Skipped 8% of grazing area & plan to cut this next week, growth rate for past week surprisingly good, but this has come on the paddocks with grass, re-growths for past 5 days slow, due to harsh easterly breeze
- Soil temp averaged 10.4°C for last week. Rainfall only 1.2mm. Excellent grazing conditions. Possibly running into an issue with SMD, due to lack of rain!
- Issue with fouls in the group of 2014 Autumn born calves – hard ground with divets??
- Sires for spring breeding have been selected & straws delivered for MSD 25/04/15, see table below.
