

Demonstration Farmer Update from John Galvin 18 Feb 2022

Cows calved: 71%

Percentage grazed: 0%

Farm cover: 863 kg DM/ ha

Winter growth: 4 kg DM/ ha

Cow supplementation: 4 kgs

Current Management

- Ordered protected urea
- Spread slurry by LESS on 50% of milking block in late January
- Identifying AI sires for breeding season
- Using sexed semen only to generate replacements for 2023
- Best practice protocols for sexed semen will be followed
- Aiming to get out to grass ASAP
