1. We have 30 cows milking in this group.
2. Average farm cover (AFC) is 969 kg DM/ha (351 kg DM/LU).
3. Growth rate last week was 62 kg DM/ha per day
4. Stocking rate is 2.76 LU/ha and demand is 41 kg DM/ha per day.
5. Pre-grazing yield is 1850 kg DM/ha. Rotation length is 33 days this week. Average Farm Cover is slightly above target at 969 kg DM/ha (target is 947 kg DM/ha, see budget below). We introduced 2 kg of concentrate to the cows on Friday morning due to the wet weather over the weekend and the cows have been on the 2 kg since. Once the weather improves we will remove the concentrate again as growth rate is still well above demand and we could end up with too much grass.

6. Cows are being allocating 15 kg DM of grass/cow and 2 kg of concentrate is being fed. Minerals (Mg) are being administered through the water.
7. This group of cows are currently milking 13.2 kg/day at 5.23% fat and 4.40% protein. Milk solids per cow are 1.26 kg/day.
