#### Cover Parameters

Grass Allocation/LU (kg DM/LU):	17.0	Growth Rate:	45
Total Livestock (LU):	30.0	Farm Demand (kg DM/ha/day):	47
Farm Cover (kg DM/ha):	801	Target Pre-grazing yield (kg DM/ha):	1408
Farm Cover (kg DM/LU):	290	Days Ahead:	17
Stocking Rate (LU/ha):	2.76	LW/ha (Liveweight/ha):	0

1. We have 30 cows milking in this group.
2. Average farm cover (AFC) is 801 kg DM/ha (290 kg DM/LU).
3. Growth rate last week was 45 kg DM/ha per day.
4. Stocking rate is 2.76 LU/ha and demand is 47 kg DM/ha per day.
5. Growth rate dropped from 70 kg DM/ha per day the previous week to 45 kg DM/ha per day last week. As a consequence AFC remained fairly static however, AFC is on target (see budget below). We will blanket spread the farm with the remaining fertiliser we have left this week, which is between 23 and 30 units/acre depending on the paddock so hopefully this will give us a boost in growth. We will have to monitor growth as we may have to introduce supplement in order to ensure that AFC continues to increase.

6. Pre-grazing yield is 1700 and we are allocating 17 kg DM of grass and no concentrate is being fed. Minerals (Mg, I, Se, Zn, Cu and Co) are being administered through the water.
7. Current milk yield for this group is 17.0 kg/day at 4.81% fat and 4.02% protein giving 1.50 kg milk solids/cow per day.
