

cv. 'Sonsation' Strawberry Production Trial

- Variety is a mid season 'June-bearing' (short day)
- From the Dutch 'Flevo Berry' company
- Berries appearance like 'Sonata'
- Very compact plant

This experiment

- Crop is grown in coir and peat
- Tray plants
- Planted mid March 2018
- Planted at 10 plants m²

Potential impacts

- Compact upright plant habit
- High yield
- Very high flower number
- May be more suited for direct sales
- Extra magnesium in the feed needed
- Dense foliage
