* Maximum number of treatments must not exceed 16 in any 1 year
** No more than 2 consecutive applications should be applied

Other specific restrictions:

1. To avoid risks to human health & the environment comply with the terms of this approval in conjunction with the directions for use on the product label.
2. For any individual crop the maximum total dose refers to the total dose of any product containing the same active ingredient.
3. Application by tractor mounted/trailer/hand-held equipment.
4. Application to strawberry, lettuce, courgette, cucumber, melon and summer squash must be made in a minimum of 600 l water/ha. Application to aubergine, tomato and peppers must be made in a minimum of 500 l water/ha.
5. When applying to aubergine, tomato and peppers use when temperatures are <30°C and relative humidity is >75%. Late evening applications are preferred. Do not mix Karma with products having EC formulations, copper-based products, soluble fertilisers or mild alkaline solutions.
6. Post application, do not allow unprotected persons to enter treated areas until the crop is completely dry & has been well ventilated.
There is limited evidence of crop safety and/or product efficacy available for this extension of authorisation for minor uses and the commercial risk of using this product on the crops/situations listed in this document is borne entirely by the grower.
