

Protected urea stops ammonia-N loss
 ⇒ N is reliably retained to grow grass
ask for NBPT, 2-NPT or NPPT active ingredient

Teagasc cutting & grazing trials show protected urea is reliable for yield

	CAN	Urea	Urea + NBPT
Cost of N	★★★★	★★★★★	★★★★★
Yield	★★★★★	★★★★★	★★★★★
N recovery efficiency	★★★★★	★★★★	★★★★★
Greenhouse gas	★★	★★★★★	★★★★★
Ammonia gas	★★★★★	★★	★★★★★

Take home messages

- ☑ Ask for NBPT, 2NPT or NPPT
- ☑ Protected urea can be spread **throughout the growing season** & is reliable for yield
- ☑ Lower greenhouse gas loss than CAN
- ☑ Lower ammonia-N loss than urea

Keep up to date by checking the Teagasc Johnstown Castle
