

Renewable Heating Workshop

The Practical aspects of switching to Green Heat

Wednesday, 23rd May | Teagasc, Ashtown, Dublin 15

“Minister Naughten’s announcement in November 2017 of a Support Scheme for Renewable Heat presents an opportunity for Irish companies to avail of financial aid to reduce their carbon emissions. This event is aimed at the commercial sector, to energy managers, procurement officers and environmental managers. Ibec, Teagasc, ITT & the IFA presents a host of industry specialists to discuss the proposed SSRH, the technologies available and what steps heat users can take to avail of the support.”

Commercial and Industrial heat users are about to be presented with an exciting opportunity to convert to renewable heating systems over the next 12 months. The SEAI have been tasked by DCCAIE to design and role out the Support Scheme for Renewable Heat (SSRH), a scheme focusing on giving financial incentives to commercial and industrial users of heat to convert to renewable heating systems.

This workshop is aimed at energy managers and procurement officers, and is designed to provide information around the opportunities for companies through the SSRH. We have an expert panel to discuss the SSRH scheme, ESCO contracting (where the installation and operation of heating systems can be fully managed by an ESCO company) and fuel matters such as quality and the supply chain.

There will also be opportunities to meet suppliers of heating systems who will be more than willing to discuss your own business and how you could convert to renewable heating.

09:30	Registration
10:00	The Proposed SSRH Scheme <i>Ray Langton, SSRH Programme Manager</i>
10:25	Technologies for Renewable Heating <i>Barry Caslin, Teagasc Bioenergy Specialist</i>
10:50 heat	Energy Supply Contracts (ESCO's) – The easy way to buy renewable <i>Joe O'Carroll, OC Consulting</i>
11:15	Q & A
11:30	Coffee
12:00	Mobilising Irelands Forest Resource For Energy <i>Vincent Upton, Department of Agriculture, Food & the Marine</i>
12:15	Fuel and appliance quality standards <i>Noel Gavigan, IBEC</i>
12:30	Medium Heating Scale Examples <i>Tom Sheehy, Clearpower</i>
12:45	Large Scale biomass in Aurivo Co-Op, Roscommon <i>Willie Murphy, Aurivo Co-Op</i>
13:00	Q & A
13:15	Session Closes <i>Experts will remain to discuss potential opportunities with delegates</i>
