

Use of slaughter data to improve health outcomes

Data from the slaughter plant is incorporated into a dashboard system to look at various production and management parameters. The variables used are imported into a database to produce a report which allows for benchmarking and setting targets.

BENEFITS

Pleurisy ↓ **15%**
Pericarditis ↓ **5%**
Losses at slaughter ↓ **3%**

Pigs weaned per sow/year ↑ **11.8%**
Pigs reared per sow/year ↑ **14.2%**
Pigs sold per sow/year ↑ **14.1%**

Weaner ADG (average daily gain)
↑ from 433g/day to **486g/day**

Providing **information** which enables the farmer to identify problems and make improvements
