

Phosphorus (P) loss from farms

- Most losses from heavy soils
- Heavy rainfall leads to overland flow of water
- P and soil sediment washed off into drains & streams

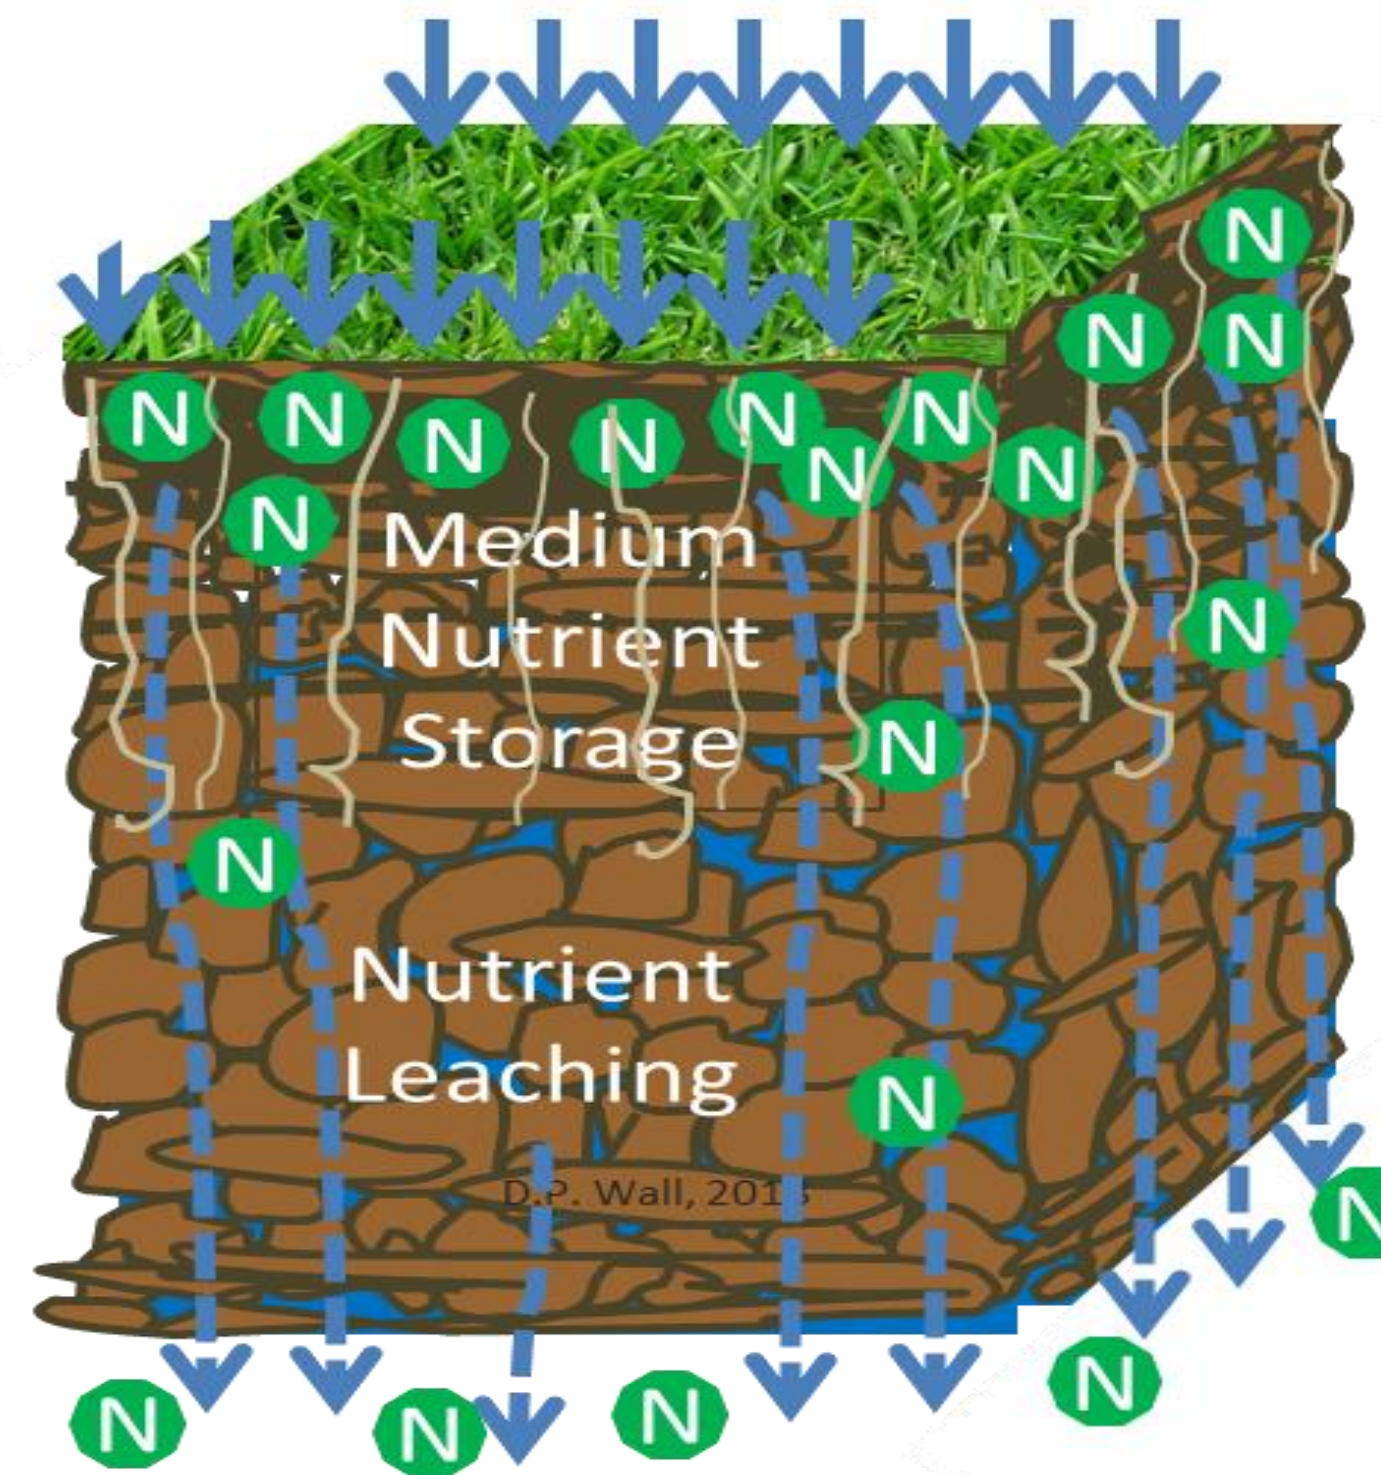

Take Home Messages

P – ‘Break the Pathway’

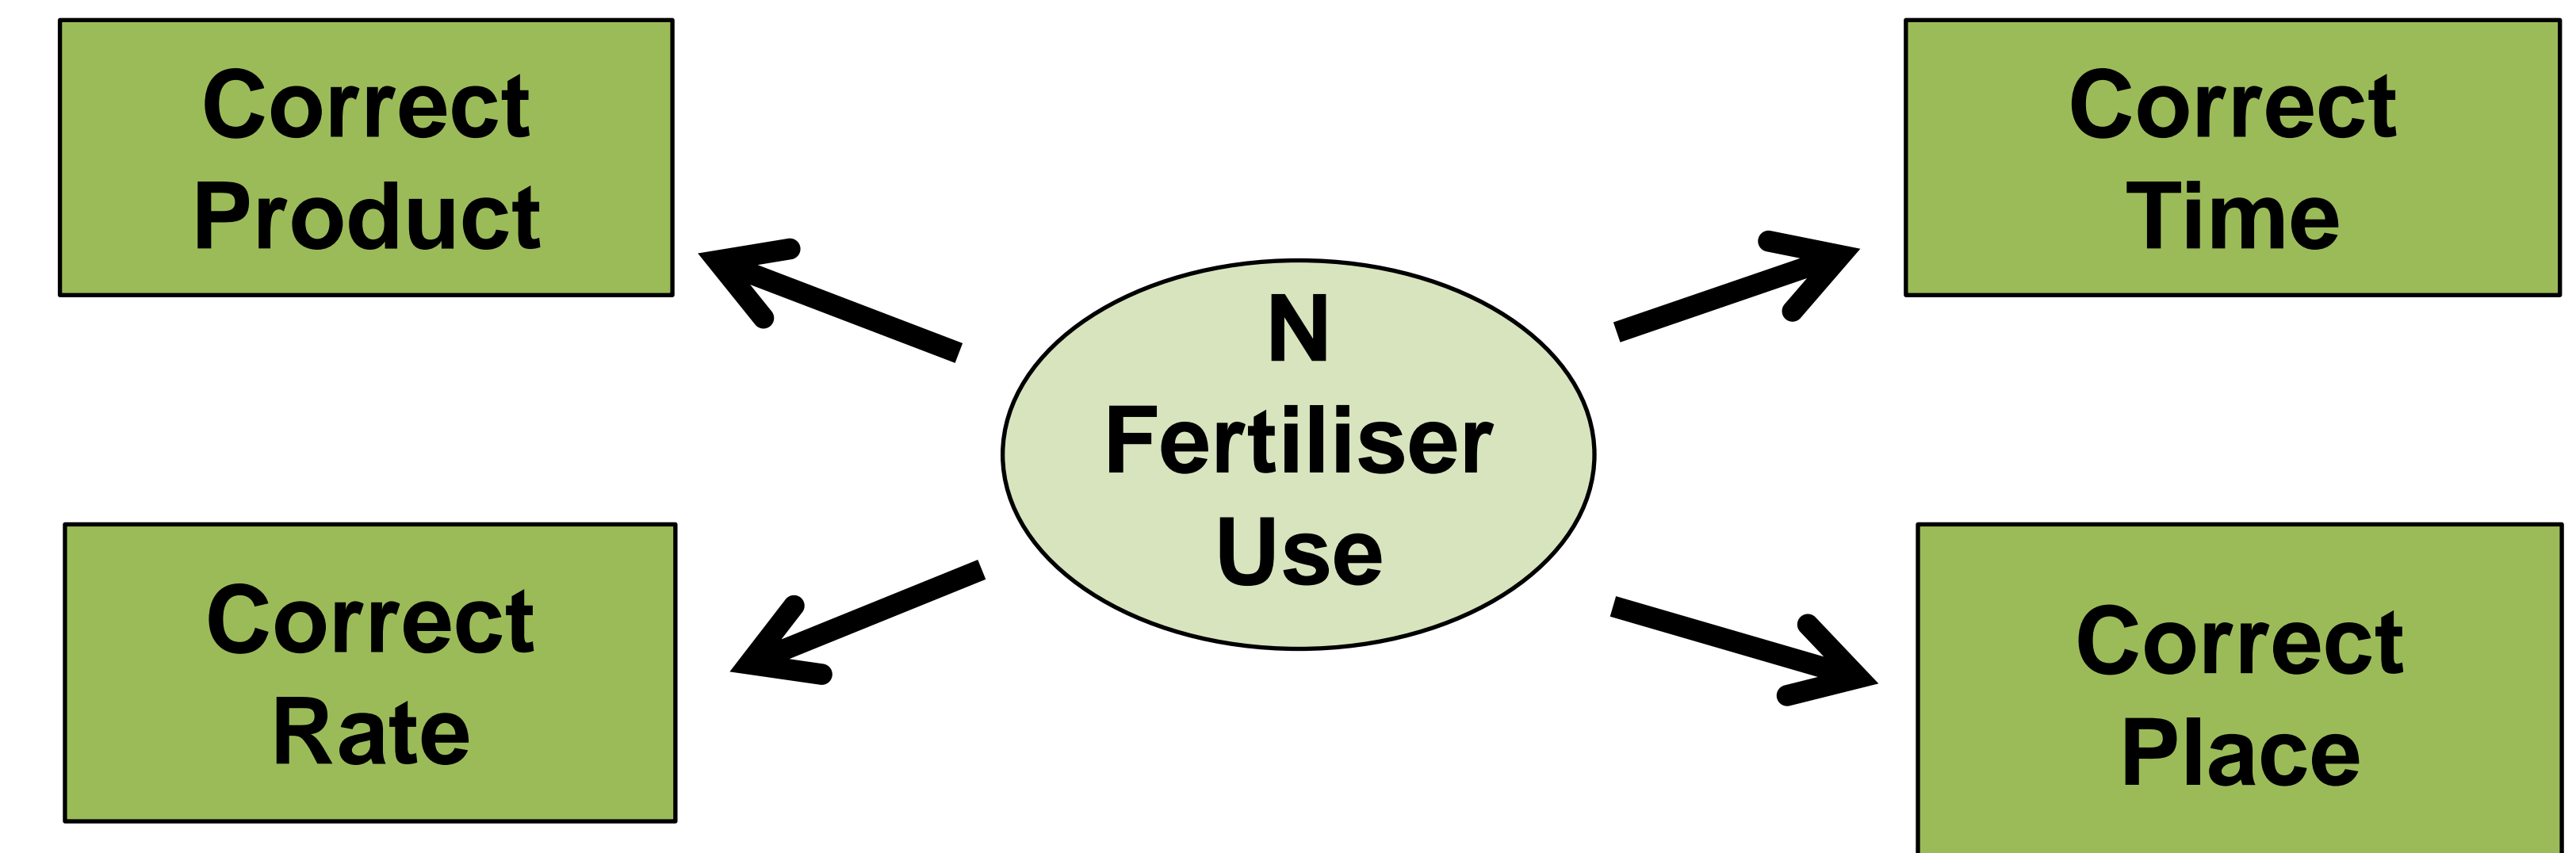

Nitrogen (N) loss from farms

- Most N losses from free draining soils
- N does not bind tightly to soil
- Leaching occurs where more N applied than plant needs
- Excess N is leached by rain to waters

N – ‘Optimise Use’

Guidelines

- Use the banner colour on this board – it is the colour for your village board
- Use a number of text boxes in the body of the board
- Different font colours and text box colours can be used – make sure they are easy to read
- Font - Arial
- Font size 72+ (graphs might have a slightly smaller size on axes, etc.). Use bold if possible.
- Use graphics (photos, diagrams, graphs, etc.) and minimise the amount of text on the boards
- Use black border around pictures/photos/charts
- Use compatible colour palette

Guidelines

- If you have a funding source, e.g. DAFM, Horizon 2020, etc., please include on top right hand corner (where Dairy Levy Logo currently is), otherwise use the Dairy Levy logo as is

Take home messages

- Include a text box bottom right with 2 to 3 key take home messages
