Foreword

This booklet on registered farm partnerships is one of a series of guideline booklets produced by the Farm Management Unit in Teagasc on Collaborative Farming Options.

Other booklets in the series are: Guidelines to Contract heifer rearing and Guidelines to Long-term land leasing.

Registered Farm Partnerships and other collaborative business structures are recognised by the Irish government as playing a key role in the improvement of the social and structural demographics of the agricultural industry in Ireland. These include amongst others: issues such as age structure, land fragmentation, smaller farm size, rural isolation and farm safety. There are a range of supports and incentives for Collaborative farming that are outlined in this booklet. They also play a key role in the achievement of national targets as set out in programmes such as Food Harvest 2020 and Food Wise 2025.

The current collaborative structures including registered farm partnerships, contract heifer rearing, long-term land leasing, share farming and cow leasing, provide the framework by which farmers can work together in a formal business arrangement. Teagasc has an excellent track record in this area having first developed the Farm Partnership model supported by the Department of Agriculture in 2002. We have since produced template agreements in the other areas of collaborative farming. This allows farmers to enter into agreements with confidence that arrangements are robust enough to deal with all eventualities. Teagasc also provides training for other professionals working in this area such as solicitors, accountants and agricultural consultants to enhance their knowledge and the service provided to farmers.

As the scale of operation increases on many Irish farms, farmers can spend longer hours working and find it difficult to secure dependable hired labour. This intensifies the amount of work to be done and the time it takes to do it. Registered Farm Partnerships provide a sustainable framework where farmers work together to improve work life balance by providing more labour and the sharing of work between partners. This also increases the skills available to run the business. Registered Farm Partnerships provide the possibility to increase financial viability for a farm family by improving efficiencies and providing the opportunity to increase scale in a sustainable way.

Registered farm partnerships play a key role in family farm succession while also providing an opportunity for existing farmers without a farming successor to enter an arrangement with a young person who is seeking a career in farming.

Further information on Collaborative Farming Options is available on www.teagasc.ie at the following link: https://www.teagasc.ie/rural-economy/farm-management/collaborative-farming/
Introduction
This document is intended as a guidance document for farm families who are considering forming a Registered Farm Partnership with the Department of Agriculture, Food and the Marine. It is also intended as a guidance document for professionals such as accountants, solicitors and agricultural consultants to help them in the formation of registered farm partnerships for farmer clients.

A partnership is a business arrangement where the profits from that business are shared among the partners in the partnership. Since 2002, partnerships have been used as a structure to amalgamate two or more farming businesses into one structure, known as inter family partnerships (Between two farm families). The most common form of partnership is known as intra family partnership (within family), where the partnership is used as a transition arrangement to gradually introduce a successor to the family farming business.

Why should two or more farmers (inter family) consider forming a registered farm partnership?

- To combine two businesses into one larger operation.
- Share workload and make more efficient use of labour
- Improve their work-life balance
- Potential to increase scale and technical efficiency through a partnership.
- Increased farming competence through utilisation of different skill sets
- Reduced isolation through working with another farmer
- Positive impact on farm safety
- Creates flexibility to allow partners to work off-farm.
- Provides a business structure for young farmers to enter an arrangement with an existing farmer who has no successor.

Why should farm families (intra family) consider forming a registered farm partnership?

- A gradual transfer of management and responsibility of running the farm.
- Son/daughter formally recognised in the farm business at an earlier stage.
- Ensures that parents are still active in the farm business and can provide support, advice and experience to their successor.
- No transfer of land required.
- Improved work life balance.
- New ideas, farming methods, skills and abilities introduced to the business
- Income tax benefits.
- Dept. of Agriculture, Food and the Marine (DAFM) scheme benefits.
**What is success built on?**
A partnership like any collaborative arrangement, must deliver benefits to all partners to become established, and to remain successful, during its lifetime. Success is built on strong core values. These include:

- Having a well prepared on-farm agreement which gives clarity how the farm will operate on a day to day basis.
- A written partnership agreement that gives clarity to the formation, operation and dissolution of the partnership.
- Trust among partners
- Transparency & Honesty at all times
- Respect & Understanding among partners
  - An appreciation of others’ skills and abilities and personal circumstances
  - An understanding of what the priorities of the partners are.
- Good Communication
  - Keeping your partners informed at all times.
  - The ability to listen and respect other points of view.
  - The ability to compromise.
  - A willingness to plan and make decisions together.

**Who can form a registered partnership?**
All farmers can form registered partnerships regardless of the farm enterprise. This includes:

- Two or more existing farmers combining their respective enterprises into one business.
- A family farm where the partnership is used as a transition arrangement to formally integrate the farming successor into the business.
- An existing farmer with no farming successor and a young trained person seeking a career in farming. (See Appendix 1 for education qualifications).

A Registered Farm Partnership (RFP) must be made up of at least two people, one person from category (i) below and one or more person(s) from categories (i) or (ii):

(i) A farmer who has been farming >3Ha in his or her own right for two years preceding the date on which the partnership is established; and
(ii) A person with an appropriate agriculture qualification whose contribution to the farm partnership entitles him/her to at least 20% of the profit sharing arrangement.
(iii) Other persons, aside from those described in categories (i) and (ii) above, for example, co-owners, family members or a person with or without land who wish
to make an investment may also be registered as participants in the partnership but will not have access, in their own right, to EU and State support scheme benefits, that may accrue to membership of the Farm Partnership Register.

NOTE: A person may not, at any one time, be a partner as a natural person and as a shareholder or director in a company that is a partner in the same Registered Farm Partnership. Similarly, at any one time a person may not be a shareholder or director in more than one company that are partners in the same Registered Farm Partnership.

Who should be a partner in the Partnership?
Anybody who is actively involved in the running of the farm business may be named as a partner in the partnership. In family situations, this may include: husband, wife and son or daughter.
Co-owners (spouses) of the land included in the partnership may choose to be included as partner in the partnership or to remain outside the partnership (if not involved in the farm operations). Where a co-owner chooses to remain outside the partnership, they may apply to the Minister of Agriculture for an exemption. An RFP/COE form is completed as part of the registration process to obtain this exemption.

What do research and operating models tell us?
Research in the Norway and Ireland and operating models in France have shown that joint farming ventures (including partnerships) have many benefits for the farmers who operate through them. They can provide:
- A better farming lifestyle and improved work environment.
- Increased leisure time.
- Easier access for new entrants and successors.
- More efficient use of resources, labour & skills.
- Opportunities to expand the farm business.
- Increased diversification activities.
- Improved technical performance and financial performance.
- More time to secure off-farm employment.
Financial Benefits
The formation of farm partnerships has been incentivised by successive Irish governments to increase the number of farm partnerships in operation in Ireland. Incentives can be categorised into two categories: Taxation Incentives and EU/DAFM scheme benefits.

1. Taxation Incentives
Profits in the partnership are calculated at the end of the tax year. They are divided in line with the profit sharing ratio specified in the written legal agreement. Each partner makes a separate income tax return in their own right. This structure allows the partners to access a number of taxation benefits. They are as follows:

Enables farm families to maximise the low rate (20%) income tax band.
The low rate of tax is currently set at 20%. Due to the sharing of profits in the partnership each partner can avail of this tax band to the current upper limit of €35,300. An example would be in a family situation, where a father, mother and son/daughter are in partnership and the profits are split equally in one third shares. The family can earn up to €105,900 at the 20% tax band.

Access to Young trained Farmer Stock Relief
A young trained farmer who is under 35 years of age and sets up for the first time in farming can claim Young Trained Farmer Stock Relief against any growth in the value of livestock during the accounting year. The upper limit that can be claimed is €70,000 over a four year period following setup and the maximum that can be claimed in any one year is €30,000. In a partnership, a young trained farmer can claim the equivalent share of the increase stock to value to their share of the farm profit at 100% for four years.

Access to enhanced Stock Relief for parents1
Enhanced stock relief is at a rate of 50% and is subject to a maximum of €15,000 over a three year period. This relief becomes available to the respective partners once the partnership is registered with the Department of Agriculture, Food and the Marine (DAFM) Farm Partnership Registration Office.

---

1 Enhanced stock relief is only available to farm partnerships that are successfully registered with the Department of Agriculture, Food and Marine Farm Partnerships Registration Office, Agriculture House, Kildare Street. Dublin 2.
Succession Farm Partnerships

A succession tax credit was introduced in 2017 to encourage experienced farmers to form partnerships with young trained farmers and to transfer ownership of their farms to those young trained farmers. There is an annual tax credit of €5,000 for up to 5 years for succession farm partnerships. No partner in a succession farm partnership is entitled to the credit in a year of assessment where a successor has reached the age of 40 years by the 1st January of that year. The criteria are as follows:

- One partner in the Succession Farm Partnership must be a person who has farmed in their own right on a minimum of 3 hectares for at least two years. They must also be a sole trader. This person is defined as “Farmer”.
- One partner in the Succession Farm Partnership must be a young trained farmer and “the credit can be claimed in any tax assessment year where the successor has not yet turned 40 at the beginning of that tax assessment year”. This partner is defined as “Successor”. The successor must also be a sole trader.
- A certified farm business plan (Teagasc My Farm My Plan Booklet) must be completed for the partnership. Teagasc is the certification body for this farm plan.
- A supplementary legally binding agreement to the farm partnership agreement must be signed by the “Farmer” and “Successor” who are partners in the same registered farm partnership. The succession agreement must specify the year of transfer and outline the assets to be transferred. The year of transfer must be within 3 to 10 years of registering with the DAFM to claim the tax credit and a minimum of 80% of the farm assets outlined in the agreement must be transferred. The €5,000 income tax credit is split annually in accordance with the profit sharing ratio of the partnership, between the Farmer and the Successor.
- The decision to avail of this income tax credit should not be taken lightly as any tax credit claimed will have to be repaid where the agreed transfer doesn’t take place..

NOTE: A registered farm partnership can be formed without availing of this farm transfer tax credit.
2. Common Agricultural Policy (CAP) Scheme Incentives

Measures announced under the CAP reform in 2014 contained a number of incentives that benefit registered farm partnerships. They are as follows:

**The Young Farmer Scheme**

Where a partnership is formed and one of the partners qualifies as a young trained farmer. The formation of a partnership enables a qualifying young farmer to avail of the young farmer scheme. To do this they must be added to the existing herd number using an ER1.1 form. They must be named on the partnership bank account and sign a legal declaration that they have effective and long term control either solely or jointly. Payment of the Young Farmer top-up may be obtained up to a maximum of 50 activated entitlements declared by the partnership in the year of application.

**Young Farmer National Reserve**

Where funding is available and the scheme is opened for applications, a young farmer in partnership with their parents may apply to the scheme to receive a top-up on low value entitlements (less than the national average) or apply for new entitlements on land that has no entitlements associated with it. The maximum number hectares that can be applied for in this scheme is 90 hectares. The qualifying young farmer must be added to the existing herd number using an ER1.1 form; be named on the partnership bank account and sign a legal declaration of control. This scheme is also subject to an off-farm income limit of €40,000. There are two situations that arise:

- Where a qualifying young trained farmer joins the parents on the existing herd number, the off-farm income (with some exceptions) of all partners is counted towards the off-farm income limit. If the application meets the scheme eligibility criteria successfully. The entitlement top-up or new entitlements granted can be allocated to all hectares declared by the partnership up to the limit of 90 hectares.
- Where a qualifying young trained farmer has farmed in their own right for at least one year, then only their off-farm income is counted but any top-up is only paid on the hectares that they themselves contribute to the partnership.

---

2 A qualifying young farmer is someone who: is participating in the Basic Payment Scheme; is under 40 years of age during the year of first application; and is less that 5 year farming in their own right or through a partnership or a Limited Company and has successfully completed a Fetac Level 6 or its equivalent in agriculture or is currently participating in such as course. In a limited company, the qualifying young farmer must have a shareholding of at least 20 %.
**Targeted Agricultural Modernisation Scheme (TAMS II)**

Partnerships that are registered with the DAFM Partnership Registration Office may be eligible for double investment ceiling under TAMS II. This means that the €80,000 investment ceiling may be doubled to €160,000. The rate of grant is as follows:

- 40% on an investment of up to €160,000 where the partnership does not have a qualifying young trained farmer.
- 60% on the first €80,000 ceiling and 40% on the second €80,000 ceiling where the partnership has one partner who qualifies as a young trained farmer.

Where a registered partnership has young farmer who has not yet completed the required agricultural training, they may still avail of the double investment ceiling at the 40% rate. The additional 20% rate for a young trained farmer on the first €80,000 will not be paid until the required education is completed. The terms and conditions of the TAMS II scheme allow 3 years from the date of application for the education to be completed.

**Collaborative Farming Establishment Grant**

This grant is paid to partnerships who register successfully with the DAFM Partnership Registration Office. Receipts and invoices that are specifically for the set-up of the partnership can be included. The rate of grant is 50% on a maximum spend of €5,000. Therefore, the maximum grant attainable is €2,500.

Where the partnership involves a category (ii) farmer who has not yet completed the required agricultural education, the grant will be withheld until such time as the education is completed successfully.

The Partnership Registration Office send a website link to the nominated email address of all successful new partnership registrations to apply for this grant online. Receipts should be posted by Swift post to the Partnership Registration Office after the application has been submitted online. In cases where email is not used by the partnership, the registration office will post out a paper application form for completion manually. This completed form should be returned along with receipts by Swift post. Copies of all receipts and proof of posting should be kept on file as a record.

**Multiple Payments:**

Where farmers have farmed in their own right prior to forming partnership, they are eligible to continue to receive payments due to them under the Area of Natural Constraints Scheme (ANC), Green, Low-Carbon, Agri-Environment Scheme (GLAS) and the Organic Scheme. Advice from your Teagasc advisor or consultant should be sought to ensure that herd numbers are set up correctly to enable this to happen.
Areas of Natural Constraints Scheme (ANC)
Where two or more farmers who qualify for ANC payments in their own right, form a registered farm partnership, they can continue to receive their ANC payment. Changes made to the terms and conditions of the scheme in 2016 ensure that the eligibility criteria for ANC payments are applied at partnership level.
Once the partnership meets the minimum eligibility criteria, payment will be based on the ANC eligible parcels of land declared under the respective herd numbers within the partnership. The payment will be made as one payment.

Green, Low-Carbon, Agri-Environment Scheme (GLAS)
Multiple payments are also available under the GLAS scheme. There are a number of situations that arise.
- Both farmers are in GLAS. Both continue with their original individual GLAS contracts.
- A partnership involving two farmers who wish to join GLAS for the first time. One new GLAS plan is drawn up for the partnership but payment measures are doubled.
- A partnership involving two farmers who farmed separately where one is already participating in GLAS and the other partner is not but wishes to join the scheme. The second farmer is eligible to join GLAS as an individual or they have the option to increase the measures taken on by the first partner.

Organics Scheme
Farmers in a Registered Farm Partnership are eligible to apply for the organic scheme provided that:
- The application is made in the same name as the Basic Payment Application.
- The application is accompanied by a list of the LPIS parcels each individual partner has brought to the partnership.
- One partner in the partnership completes or has completed the relevant training course specified by the scheme.
- The minimum area for partnership shall be the same as for an individual applicant.
- The maximum area for higher payment as outlined under the organic scheme can be applied for up to a maximum of 3 partners.
- All partners are equally responsible for the delivery of all actions under the scheme on the lands farmed by the partnership.
The Formation of a Partnership
There are four key areas to be considered when setting up a partnership. Each of these areas must be addressed during the formation of the partnership agreement. They are as follows:

1. The On-Farm Agreement
2. The Template Partnership Agreement
3. Interaction with DAFM Structures and Schemes
4. Accounting Structures

The On-Farm Agreement
The on-farm agreement is a linked document to the main legal partnership template agreement. The careful completion of the on-farm agreement is the key to a successful partnership. Issues that may undermine the arrangement generally start where a partner becomes unhappy with how the arrangement is running. The on-farm agreement is essentially a document where the partners sit down and agree in writing how the farm will be run on a daily basis and how the work is fairly distributed between the partners. It is highly recommended, that farmers put a lot of their own personal effort into this document when forming a partnership.

Some of the key areas in the on-farm agreement to concentrate on are as follows:

- **Areas of responsibility**
  Work is allocated in a way that makes the best use of each partner’s different interests and skillsets to the benefit of the partnership.

- **Work structure**
  This means devising a work structure that is fair to all partners. Working together in busy times to get through the work efficiently and structuring the work in quieter times to enable partners to take time off, work alternate weekends and plan family holidays.
Time off and Holidays
Details of how time-off and holidays are structured so that all partners benefit equally from the arrangement. Provided it is fair to all partners, this does not always have to be a rigid structure and can be left flexible based on agreement between the partners.

Drawings and Salaries
Setting agreed drawings and salaries that are realistic and in-line with farm profits but also reflect the level capital, farm assets contributed and the hours of work put in by each partner.

The Template Partnership Agreement
The Teagasc template partnership agreement should be used to form the legal agreement for all registered farm partnerships. It is composed of two linked documents:
- The on-farm agreement (as previously summarised).
- The template legal partnership agreement.

This template legal agreement was carefully put together with expert financial and legal advice to ensure that partnerships are: set up correctly; can operate effectively and can be dissolved easily. There are a number of elements in the document to guide farmers and professionals in the formation of the partnership. There are two key elements that deal with the treatment of farm assets and the contributions of partnership capital by each partner. They are: a licence agreement and preparation of capital accounts for each partner.

The Licence Agreement
The licence is a legal permission for use of an asset by the partnership. It covers assets such as land, buildings, basic payment entitlements, grain or seed contracts and any other asset of that nature such as shares in a co-op to produce a certain volume of milk. The licence provides security and assurance around the ownership of these assets. It protects partners from capital tax liability on the use or transfer of assets. The license is revoked on the dissolution of the partnership agreement. This means that when the partnership ends the assets listed in the legal agreement under the licence, return in full to the owner.

Capital Accounts for each partner
Other assets that need to be considered in the formation of the partnership are livestock, machinery and working capital (money in the current account or equivalent). In the formation of the partnership, it is good accounting practice to
prepare a capital account for each partner to record the value of livestock, machinery and capital contributed by that partner. The capital accounts are updated by the accountant each year to reflect any changes in the capital position for each partner. Capital can be increased by an individual partner over time by: (i) leaving profits in the partnership bank account for cash flow after taxation is paid or by making further capital contributions to the partnership from personal savings or personal borrowings. Where the capital account is created and updated correctly, it becomes a key mechanism for dissolving the partnership when the need arises.

The Teagasc template legal agreement and the on-farm agreement can be downloaded from www.teagasc.ie and www.agriculture.gov.ie. It is also available on the Law Society website for solicitors.

The interaction with DAFM structures and schemes will be explained in the following sections while the section on the role of your accountant will explain the accounting structures.

The Role of your Teagasc Advisor/ Agricultural Consultant

The Teagasc advisor or agricultural consultant is best placed to help to plan the future direction of the farm business and to advise on technical issues associated with setting up the partnership. This may involve;

- Supporting the farm family in the creation of a succession plan to include all family members including the chosen farming successor.
- The advisor may also examine the current viability and financial situation on the farm and create a business plan (My Farm My Plan Booklet) for the farm to ensure that enough income is generated through on-farm and in some cases off-farm activities, to meet the requirements of partners in the partnership. The plan should be reviewed annually and modified in line with the changing circumstances of the partners.
- The advisor may review the technical performance on the farm and co-create a physical plan with the partners to improve technical performance. This plan will focus on the key performance indicators and set out targets to be achieved each year.
- The advisor can support the learning of the farmers in new skills to improve both technical and financial performance on the farm. These new skills impact directly on farm profit. Such skills may include: grassland management skills, cash flow budgeting skills, supporting better animal breeding decisions and improved crop husbandry decisions.
The advisor can help the farmers with the completion of the On-farm Agreement. This may involve technical expertise on routine tasks to be carried out on the farm. For example the advisor may help the partners to agree on a milking routine that is followed by each partner regardless of who milks the cows.

The setting up of the partnership can be complex when interacting with DAFM structures and CAP funded schemes. The advisor has an in-depth knowledge of the requirements for setting up the partnership herd number to which all these schemes are attached. They have a high level of expertise in the forms required and the implications for various scheme applications. They are best placed to ensure that the partners in the partnership can maximise the benefits of the CAP schemes such as the Basic Payment Scheme, TAMS II, ANC, GLAS and the Organic scheme.

The Role of your Solicitor

The legal basis for all partnerships in Ireland is the 1890 Partnership Act. Where there is no written agreement, this Act was put in place as the default law for businesses where profits are shared by the partners in that business.

A written partnership agreement is an amendment of the Partnerships Act for a particular partnership. It is the key document where farmers entering a partnership can shape the arrangement to suit their own needs and is therefore the cornerstone of the partnership.

While template agreements are available, it is not sufficient to complete a template without legal advice. Before entering into a farm partnership, the partners should consult with their solicitors. The role of the solicitor is to:

- Explain the legal structure and highlight the relevant details of the 1890 Partnership Act.
- Provide expertise on other legal matters such as:
  - Making a will.
  - Contribute to the farm succession plan by providing advice on farm transfer.
  - Advise on the legal basis for registered farm partnerships (SI 247 of 2015).
  - Advise on other relevant laws such as taxation and EU law where necessary.
- Review the Teagasc template legal agreement and highlight key features.
- Where necessary make amendments to the template agreement to meet your particular circumstances. This may involve the inclusion of additional clauses to protect both parties.
- Liaise with the accountant and/or an agricultural consultant in the preparation of documents relating to the formation and registration of the partnership.
The Role of your Tax Accountant
The role of the accountant can be divided into two areas:
(i) Advice and help in the setting up of your partnership
(ii) Making income tax returns annually. During the formation of the partnership, your accountant should carry out the following:

- Register the partnership with Revenue using a TR1 form. The partnership will then receive a Tax reference number from Revenue.
- The accountant must be given your consent to act on behalf of the partnership with Revenue by completing an Agent link form.
- Create a capital account for each partner to record the value of livestock, machinery and working capital contributed by each partner.
- Apply Cessation & Commencement Rules where they apply. Where the annual farm accounts are done on the calendar year basis, it is normally best to commence the partnership on the first of January in the relevant year.
- Your accountant can advise you on establishing a profit sharing ratio and also on setting appropriate levels of salaries and /or personal drawings in the On-farm Agreement.
- Liaise with you solicitor and / or agricultural consultant in the preparation of documents relating to the formation of the partnership.

As the partnership progresses, the accountant must complete the following duties on an annual basis for the partnership:

- Calculate the annual profit for the partnership and apply the profit sharing ratio based on the written partnership agreement.
- Make separate tax returns for each partner based on their share of the partnership profits.
- Complete a FIRMS 1 form and submit to Revenue. This form outlines the profit split between the partners in keeping with the legal partnership agreement.
- Annually update the capital account for each partner in line with any capital invested or retained in the business during the accounting year. This function is vital as it is a key element in dissolving the agreement at the end of its life time. On the date of dissolution, the capital account for each partner shows the exact capital invested during the lifetime of the partnership.

NOTE: Before a partnership takes on capital investment such as buildings, infrastructure etc. the feasibility, design and funding of the project must be thoroughly thought out and agreed between the partners. It should be discussed at length with the agricultural advisor and the accountant. Always put a written dissolution agreement in place in respect of each new capital investment during the planning of project. This agreement will give clarity to the dissolving of the partnership if the need arises and how any new investments are to be treated at that time.
Registering the Partnership

To register a farm partnership, a completed application must be submitted to the Farm Partnership Registration Office, Agriculture House, Kildare Street, Dublin 2. A checklist is available (see Appendix 2) from the Department of Agriculture, Food and the Marine (DAFM) to guide applicants in providing all the required documentation for a successful registration. It is very important that farmers and their professionals pay particular attention to this checklist in lodging an application.

Every effort must be made to include all the required documentation in the checklist and to ensure that the included documents have been completed correctly and professionally. This will minimise any possible delays in processing and registration as incomplete documents or incomplete applications will be returned to the farmer by the partnership office. The documents required are as follows:

1. A completed partnership registration application form. Ensure that all herd numbers are included on this form under the relevant partner. Each partner must sign the application to register the partnership.
2. A Bank Details form that shows the details of the partnership bank account, stamped by the relevant bank.
3. A signed original copy of the Partnership Agreement. This must be completed correctly showing, amongst others the: details of the partners; included farm assets; balance sheet and profit sharing ratio. The agreement must be signed by all partners and spouses where relevant. A partner who is farming through a limited company must sign the agreement on behalf of the company and include the company stamp. Signatures can be witnessed by a solicitor, accountant, agricultural consultant or a peace commissioner.
4. A completed On-farm Agreement. This document should be completed by the partners and signed by all partners.
5. Up to date copy folios and filed plans for all owned lands. These may be obtained from a solicitor or downloaded from www.landdirect.ie. They are proof of ownership of the land included by each partner in the partnership and they also highlight to a solicitor, accountant or agricultural consultant if the land is co-owned.
6. Copy of stamped leases for all lands leased in. Land leased in by a partner can be licensed to the partnership along with owned land or land held on conacre. A copy of the stamped lease is required as proof that a partner has possession of the land.
7. Evidence of agricultural qualifications for Category (ii) partners. To register a partnership on the DAFM register, a category (ii) partner must provide a copy of their FETAC Level 6 Agricultural education qualification or equivalent.
Where a category (ii) partner has not yet completed the required agricultural education, they should contact the DAFM Partnership Registration Office, the local Teagasc education officer or the nearest Agricultural College for guidance in relation to achieving the education requirement. Education courses that meet the agricultural education standard are listed in Appendix 1.

8. RFP/COE form. This form is only required where the lands to be included in the partnership under licence, are co-owned by a spouse who does not wish to be a partner in the partnership. The Minister of Agriculture has the power to grant an exemption to such a person on application. This exemption ensures that co-owners who do not wish to be partners in the partnership can qualify for retirement relief against Capital Gains Tax in a lifetime transfer to a successor at a later date.

A Step by Step Guide to forming a Registered Farm Partnership.

Forming a Partnership—“The Steps”

1. On-Farm Agreement
   - Responsibility/Work Structure
   - Time off/holidays
   - Salaries/Drawings

2. Consult with Teagasc Advisor

3. Consult with Accountant

4. Consult with Solicitor

5. Partnership Formation & Registration

The Irish Agriculture and Food Development Authority
1. Setting up the partnership herd number

There are two types of Registered Farm Partnership
A) Single herd number partnership
B) Multi herd number partnership

**Single herd number partnership.**
The vast majority of farm partnerships formed to date are Single herd number partnerships. They tend to be between different members of the same family. All members of the Registered Farm Partnership need to have ownership of the herd number. A herd keeper is also required; this person becomes the main contact person for the Regional Veterinary Office (RVO) for animal disease purposes.

- **ER1.1 form** should be used where names are added to a herd number provided the registration details and herd keeper are not changing (e.g. Herd Number changing from David Browne to David, Mary & John Browne).
- **ER1 form** is required where the herd keeper is changing.

When the ownership of a herd number is changed, all DAFM Departments must be notified of the changes. This is to ensure all DAFM schemes are kept up to date to ensure payment. The CAP entitlements must also be changed into the partnership names. It is recommended practice to seek prior approval, from each DAFM section, as for some schemes, this is a mandatory requirement, or participation in the relevant scheme could be terminated. Your agricultural advisor should be able to give guidance on the procedures for each DAFM scheme.

**Multi-herd number Partnership**
For multi herd partnerships, there is no requirement to make any changes to the herd numbers. This change was implemented during the summer of 2019 and will significantly reduce the risk of errors and administration when forming a partnership.

Where one of these two herd numbers is being made dormant (will no longer contain livestock), it is vital to instruct the DVO in writing not to “End Date” this herd number. It is still required for payment purposes under the Basic Payment Scheme, Area of Natural Constraint Scheme, Organic Scheme and GLAS schemes etc.

**When is best time to change a herd number:**
It is important to be aware that if changes are made to a herd number after the Basic Payment Scheme application and amendment deadlines, it may cause delays in the receipt of payments in that year. This should be discussed with your agricultural advisor.

The key window for making changes to a herd number is after basic payments
application period has closed (9th June) but well in advance of the Basic Payment Scheme Application period for the following year. Generally, this means changes should be made from mid-summer until the end of February the following year to allow ample time for successful processing of the ER1 and ER1.1 forms by the District Veterinary Office.

**Basic Payment Scheme Entitlements**
Any changes to the names on a herd number will require a “Transfer of Entitlements” form. If the changes occur before the Basic Payment Scheme deadline, then the transfer form must be submitted before the Basic Payment Scheme deadline. Where the change occurs after the Basic Payment Scheme deadline, a transfer form will have to be submitted before the BPS closing date in the following year.

2. **Setting up the Partnership Bank Account**
In the majority of situations, financial institutions (the bank) will not permit a name to be added to an existing current account. A new partnership bank account must be set up in the same name as the partnership. This becomes the trading account for the partnership through which all partnership income and expenditure is channelled.

It is vital to take ownership of the process of moving bank accounts to ensure that any direct debits or standing orders for utilities or loan repayments are re-established in the new partnership bank account.

3. **Completing the On-Farm Agreement**
The on-farm agreement should be completed by the partners and their families as part of setting up the partnership. Some professional help can be used in this document but the day to day operation of the partnership is very much the responsibility of the partners. If this aspect is not taken seriously, many of the benefits from partnership formation such as improved lifestyle will not become a reality.

4. **Completing the Registration Process**
The formation of the farm partnership and the registration process is typically completed with the help of all of the following professionals or a combination of all three:
- Teagasc Advisor/The Agricultural consultant
- The Solicitor
- The Accountant

The roles and responsibilities of these professionals have been described in earlier in this booklet and it is vital that these professionals co-operate and work together in the formation of the partnership to achieve the best result for the farm family.
Name: Frank, Kitty & Ivor Tanner

Structure: Registered Farm Partnership since 2008

Farm System:
- Milking 100 spring calving cows and replacements.
- Farm Size: 74 hectares farmed
- Land accessible by cows: 38 hectares.

Farm Development since beginning in Partnership:
- Herd Expansion
- Joining a local Teagasc discussion group
- Improvements in infrastructure & technical efficiency
- Construction of new cow accommodation & slurry storage
- Land Reclamation & Reseeding
- Construction of new milking facilities.

Succession in Action
Ivor has a greater role in decision making on the farm now but still has the support of Frank and Kitty to discuss ideas and decisions with. Lifestyle has improved through the development of the farm facilities and infrastructure to handle the dairy herd. This capital investment has taken place due to the presence of Ivor as a farming successor and the recognised role that partnership has given him in the business.
Name: Ernie and Paul Bennett

Structure: Registered Farm Partnership since 2015

Farm System:
- A Suckler herd to weanling system, producing Export Quality Continental Cross Weanlings.
- Mid-Season lambing ewes.

Farm Development since beginning in Partnership:
- 5 Year Farm Plan with their Teagasc Adviser to ensure they maximise the financial and physical performance of the farm.
- Build on the Suckler enterprise and begin finishing their own stock
- Increase Output/hectare by increasing expanding suckler herd
- Investment in farm buildings and slurry storage

Succession in Action
The security of the Registered Farm Partnership has allowed both Ernie and Paul share the decision making on the farm and plan the future development of the farm together.
Name: Séamus, Marie & Imelda Kinsella

Structure: Registered Farm Partnership since 2003

Farm System:
- Milking 120 spring calving cows, carrying replacements and a calf to beef system.
- Farm Size: 101 hectares farmed
- Land accessible by cows 49 hectares.

Farm Development since beginning in Partnership:
- Herd Expansion
- Improvements in infrastructure & technical efficiency
- Land Purchase
- Land Reclamation & Reseeding
  - Construction of new milking facilities.

Succession in Action
Imelda is now the main decision maker on the farm but has the support of Séamus and Marie to support and guide her. Séamus is still very active on the farm. Profitable dairy farming and a good lifestyle are key considerations for the Kinsella’s. A concern for the future is the availability of reliable hired in labour to assist with farm work in the busy times.
Name: Andrew Purcell & Alf McGlew

Structure: Registered Farm Partnership since 2007

Farm System:
- Milking 320 spring calving cows, 160 replacement heifers.
- Farm Size: 160 hectares farmed
- Land accessible by cows 99 hectares

Farm Development since beginning in Partnership:
- Gradual dairy herd expansion
- Improvements in farm infrastructure
- Improved technical efficiency driven by the motivation to provide two family farm incomes
- Construction of new milking facilities, cow accommodation and slurry storage.

Benefits
- Lifestyle is a key driver of this partnership. The structure delivers a better lifestyle to both families.
- Both farmers have a similar outlook and ambition.
- The partnership enabled both partners increase their viability through improvements in technical efficiency and increased scale.
- The good working relationship and understanding between these two farmers is the cornerstone of its success.

16.3 Professional Diploma in Dairy Farm Management |
| --- | --- |
| 17. VETERINARY | 17.1 Degree in Veterinary Science - such awards must be accompanied by details confirming that the holder of this qualification is registered with the Veterinary Council of Ireland.  
17.2 Bachelor of Veterinary Science – UCD |
| 18. LIMERICK | 18.1 Bachelor in Science in Equine Science Degree – UL  
18.2 Diploma in Equine Science – UL |
| 19. DAIRY SCIENCE | 19.1 Degree/Diploma in Dairy Science plus 80 hours of farm management |
| 20. RURAL SCIENCE | 20.1 Degree/Diploma in Rural Science plus 80 hours of farm management  
20.2 Degree/Diploma in Science (Education) in Biological Science plus 80 hours of farm management  
20.3 Bachelor of Science (Education) in Biological Sciences plus 80 hours of farm management |
| 21. | 21.1 Non-agricultural awards or qualifications (FETAC/HETAC/IT Colleges/Universities/foreign awards) placed at or equivalent to Level 6 or higher on the National Framework of Qualifications (NFQ) and a FETAC award for an 180 hours Teagasc approved training programme is acceptable proving that both were completed prior 31 March 2008.  
21.2 Non-agricultural awards or qualifications (FETAC/HETAC/IT Colleges/Universities/foreign awards) placed at or equivalent to Level 6 or higher on the National Framework of Qualifications must complete a FETAC Level 6 Specific Purpose Certificate in farm Administration. |
| 22. | 22.1 A letter from Teagasc certifying that the applicant holds a qualification that is deemed to be equivalent to any of the qualifications listed at 1 to 20 above. |
Appendix 2:  
Checklist for Registration of Farm Partnership

In completing your partnership application form it is necessary to forward the following documentation to the Farm Partnership Registration Office. Please use the checklist below to ensure you have included all the required details.

1. Completed Checklist
2. Completed Application Form
3. Completed Bank Details form
4. A signed copy of the Partnership Agreement
5. A completed On-farm Agreement
6. Copy Folios for all owned lands
7. Copy of leases for all lands leased in
8. Evidence of agricultural qualifications for Category II partners.
9. RFP/COE form (only required if a co-owner of land wishes to remain outside the partnership)

Completed applications should be sent to:  
The Farm Partnership Registration Office, Floor 3 Agriculture House, Kildare Street, Dublin 2.
