Multi-species grasslands

- Do mixtures of grasses, clovers and herbs:
  - produce higher yields?
  - produce less greenhouse gases?
  - provide resilience to drought?

- Yield trials of two grasses, two clovers and two herbs;
  - Perennial ryegrass & timothy,
  - White clover & red clover,
  - Plantain & chicory.

- Monocultures and mixtures of 2, 4, 5 and 6 species.
