Challenge: Higher stocking rates add pressure on feed demand in spring and autumn.

**Pre-grazing herbage yields**
- Spring: 1,600 kg DM/ha
- Autumn: 1,800 kg DM/ha
- Spring: 2,300 kg DM/ha

**Pre-grazing herbage yield (kg DM/ha)**
- LPS: 1,616
- MPS: 1,793
- HPS: 2,338

**Post-grazing residual height (cm)**
- LPS: 3.5
- MPS: 3.7
- HPS: 3.9

**Fat + protein yield (kg/cow/d)**
- LPS: 1.46
- MPS: 1.45
- HPS: 1.43

**Take Home Message**
- Adjust spring and autumn feed budgeting to *maximise grass consumption* without shortening grazing season.
