

Joint Sealants

Sean Jennings (087-6374449)

Sikaflex 11fc 310ml = .31 litres = 0.00031m³

A joint of cross-sectional area of 20mm x 20mm x 1m long would need 0.0004m³ or 400ml of sealant.

Therefore one 310 tube will do a joint 20mm x 20mm 775mm long (0.775m)

If the joint was 12mm x 12mm one tube would fill the joint for 2.15m

310ml tube available in black, brown, grey and white

600ml sausage available in black, grey and white

Joint	Length of Joint per Tube (m)	Tube Size ml	Price/Metre Run	Price per Tube +VAT
12mm x 12mm	2.15	310	€5.19	€11.15
20mm x 20mm	0.775	310	€14.39	€11.15
Primer/litre tin Not always needed	Coverage =150gms - 250gms/m ²			€35.00
20mm x 20mm	1.5	600 sausage	€11.07	€16.60
12mm x 12mm	4.16	600 sausage	€3.99	€16.60
